

PRODUCT SPOTLIGHT: Automatic Bearing Greaser

Maintenance-Free Bearings with BAC Automatic Bearing Greasers

For nearly a decade, a customer at a government installation in Washington, DC felt that greasing the unit bearings has always been one of the most tedious, time-consuming tasks. Technicians typically brought their tools and greasers to the top of the building, removed a screen for each bearing, manually greased each bearing, replaced the screens, and cleaned up after the mess that the grease left!

Immediately after hearing about the BAC Automatic Bearing Greaser, the customer ordered 8 Automatic Bearing Greasers that were sized specifically for the unit bearings. The customer mounted and connected the Automatic Bearing Greasers to the exterior of the unit by using the mounting brackets included in the kit and lastly, attached the flexible tubing to the bearings before activating the Automatic Bearing Greasers.

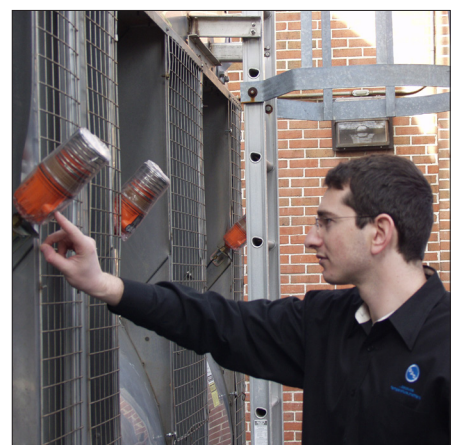

Grease is now continually supplied from the included 250cc grease pouches. Not only does this continuous supply of new grease eliminate the need for maintenance, but it also extends the life of the bearing! When the pouch is nearly depleted after a year of operation, the customer will simply replace the pouch without having to endure the hassle of manually greasing each bearing.

The customer is extremely pleased with the results of the BAC Automatic Bearing Greaser: less maintenance, no mess, and increased productivity!

A complete list of BAC Sales Representatives is available at www.BaltimoreAircoil.com. Call your representative and request your Automatic Bearing Greaser today.
