FAST CROSSFLOW REPLACEMENT FILL

QuickCross™

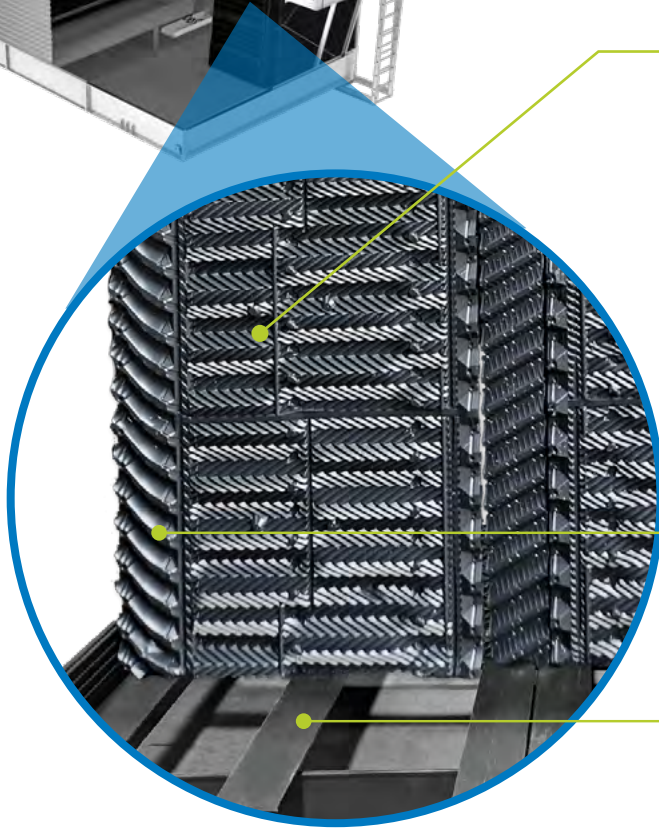

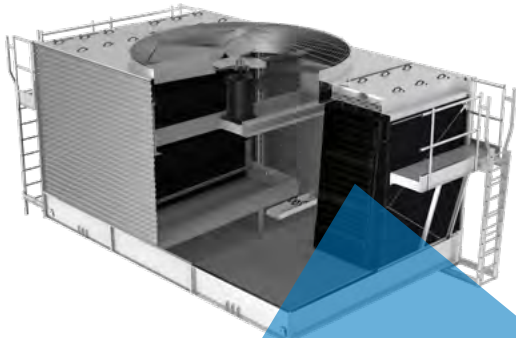

REPLACEMENT FILL KITS

QuickCross™

BACross™

Crossflow Fill

Fill sized to match the height of your crossflow cooling tower; high thermal performance and foul resistant, 15 mil self-extinguishing PVC, maximum entering water temperature 120°F

Drift Eliminators

Built into the fill, the upward flow path and steep drainage angle ensure efficient drift removal

Supports

Support system designed to maximize air and water flow
