

PRODUCT SPOTLIGHT:

Maintenance Made Easy

For Series 3000 and Series 1500 Cooling Towers

Designed for ease of ownership, the Series 3000 and Series 1500 Cooling Towers include more maintenance friendly features than any other evaporative cooling product on the market. By simplifying regular service for a unit, the entire cooling system operates more efficiently and with an increased life expectancy.

BALTDRIIVE® Power Train

Easy Access to the Water Distribution System

When specifying a new or replacement unit, consider the following standard and optional features that make these products unique:

Standard Features:

- ✓ **Crossflow Configuration**
 - › Easy access to drive components, water distribution, and cold water basin.
- ✓ **BALTDRIIVE® Power Train**
 - › Reliable belt and sheave drive system is simple to service and economical to maintain.
- ✓ **Easy Access to Water Distribution**
 - › Large orifice spray nozzles reduce clogs and custom hot water basin covers require no tools to remove. Inspection of both the hot water basins and nozzles can happen in- process without scheduled downtime.
- ✓ **Patented Sloped Hygienic Cold Water Basin**
 - › Inhibits biological growth and limits debris accumulation.
- ✓ **Fill Surface Elevated Above Basin Floor**
 - › Facilitates regular maintenance and basin cleaning.
- ✓ **Large Hinged Access Doors**
 - › Reduces labor hours via quicker entry and egress of unit. Allows equipment to be easily carried into unit.

Sweeper Piping

EASY CONNECT® Piping Arrangement

Optional Upgrades and Accessories:

- ✓ **Internal Access Packages (optional)**
 - › Provides quick and safe access to the internal plenum area for servicing of the upper components including the motor and drive system
- ✓ **External Platform Packages (optional)**
 - › Gives maintenance workers an OSHA approved work area for external inspection and maintenance.
- ✓ **Sweeper Piping (optional)**
 - › Reduces labor for regular cold water basin maintenance and complements water treatment systems
- ✓ **Combined Inlet Shields (optional for Series 3000)**
 - › Adds additional protection against biological growth by limiting the amount of light penetration into the unit.
- ✓ **EASY CONNECT® Piping Arrangement (optional for Series 3000)**
 - › Single point access for water supply maintenance. Additionally, this feature, reduces installation cost in comparison to traditional top inlet designs.
- ✓ **Single Point Inlet with Strainer (standard for Series 1500)**

Units perform their best when properly serviced. Get the most out of your cooling system by choosing a product that makes maintenance easy. Contact your local BAC Representative for recommendations on which product can meet your needs.
